

ANEMOMETER MASTS

DESCRIPTION

Pollite weather system masts have a huge range of applications, from our standard 10m masts for Anemometers, to smaller masts for RVR/ Visibility Sensors. The fully fibreglass construction allows for easy installation and a lightweight design and will not interfere with any sensitive equipment. All masts are coloured with alternative red/white banding in keeping with the ICAO regulations.

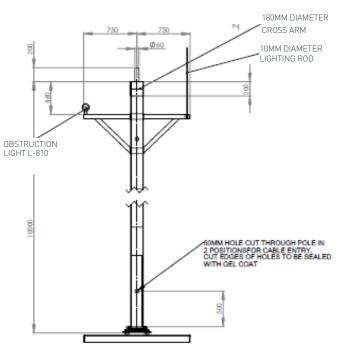

Larger masts are designed to be supplied with a full lightning protection kit and ICAO approved obstruction light. The top spigot can be supplied in order to fit any brand of sensor, and all cabling is routed through the centre of the mast to help avoid corrosion/ degradation.

FEATURES

- » Non-Corrosive
- » Non-Conductive
- » Environmentally Durable
- » Frangible ICAO/FAA Compliant
- » Easy Maintenance
- » UV And Salt Resistant Red/White Banding
- » Adjustable To Fit Any Manufacturer Sensor
- » 10 Year Warranty
- » Optional Lightning Protection System
- » Optional L810 Approved Obstruction Light

CERTIFICATION

- » FAA L-891 Low Impact Resistant Structures (AC150/5345-45C)
- » ICAO Doc 9157 AN/901 ADM Part 6 Frangibility
- » ISO 9001:2015

SPECIFICATION

Mast Height	6-10
Mast Section Diameter Ø (mm)	180
Ground Rod Diameter Ø (mm)	M16
Ground Plate (mm)	400 x 400
Expected Life	>20 years
Material	GRP
Colour	Red/White Banded As Per ICAO Requirements
Top Cap Material	Powder Coated Stainless Steel
Horizontal Cross Arms (mm)	50 x 50 x 1500
Hinged Base Material	Hot Dip Galvanised Steel
Foundation Size (mm)	1500 x 1500 x 500
Warranty	10 years
Hollow Spigot Dimensions	60 x 200mm
