

MID HINGE MAST

DESCRIPTION

The Pollite Mid-hinge mast is designed for use in areas where access for lowering is limited, or the final height is >12m. The counter balanced design allows for easy lowering using a simple rope system by 2 people. For cross arms longer than 4000mm, we provide a double support arm assembly to provide extra strength. The masts are manufactured from a fully fibreglass construction, and all cabling runs inside the hollow mast which protects them from the elements. All masts come with our standard light height adjusters to allow for final, precise installations.

FEATURES

- » Non-Corrosive
- » Non-Conductive
- » Environmentally Durable
- » Frangible- ICAO/ FAA Compliant
- » Easy Maintenance
- » Lights Lower To Base Of Mast Using A Simple Rope
- » UV And Salt Resistant

SPECIFICATION

Mast Height	<17m
Mast Section Diameter Ø (mm)	300/180/150
Ground Rod Diameter Ø (mm)	M16/20 x 500
Warranty	10 years
